Vectren Successfully Completes Implementation of FARRMS EmissionsTracker for Emissions Allowance Management.

Denver, CO, USA, July 2010 - Pioneer Solutions, LLC, is pleased to announce that

Vectren Energy Delivery (Vectren) has successfully completed the implementation of the FARRMS EmissionsTracker software solution. EmissionsTracker is being used by Vectren to manage emissions allowance inventories and compliance for its electric subsidiary.

EmissionsTracker provides a comprehensive solution that automates end-to-end emissions tracking and management processes and is designed to support enterprise-wide inventory tracking, trading and compliance. The solution supports comprehensive environmental products including emissions reduction credits, CO₂ offsets, CO₂ credits, SO₂, NO_x, RECs, and Kyoto Protocol defined products such as CER, ERU and VER. The system can also track all greenhouse gases and pollutants should an organization choose to. Powered by FARRMS (Financial and Regulatory Risk Management System), EmissionsTracker provides a leading edge integrated platform for mitigating financial and regulatory risks.

Indiana-based Vectren supplies electricity and/or natural gas to more than 1 million customers in Indiana and west central Ohio. Vectren has a diverse energy portfolio that includes coal- and gas-fired units, as well as renewable resources. The utility will use EmissionsTracker to manage the allocation, purchase, sale and compliance of SO₂ and NO_x emissions allowances, as well as keep track of actual emissions reported to the EPA.

“The rapidly evolving regulatory environment requires organizations to be very attentive to compliance issues while also maintaining flexibility for future change,” said Angila Retherford, Vectren’s director of environmental affairs. “We are pleased this software package provides us

with a tool which can streamline our current compliance activities and poise us for future adaptations as necessary.”

About Pioneer Solutions, LLC

Pioneer Solutions is a leading provider of software products, powered by the Financial and Regulatory Risk Management System (FARRMS). FARRMS is an integrated platform providing straight through processing for specific front office, middle office, and back office functions. The FARRMS solutions allow organizations to realize new efficiencies as data and processes are managed across multiple groups. In addition to the FARRMS software products, Pioneer Solutions provides consulting, implementation and environmental reporting services. Visit at www.PioneerSolutionsGlobal.com for more information.
